

Klimabonus 2026 Checklist

Succeed with your energy-renovation grant application — the 4 steps, the documents to prepare and the mistakes to avoid. Check your amounts first with the tack.lu aid calculator.

The 4 steps, in order

1 Energy advice

Mandatory for a multi-element renovation (certified Klima-Agence advisor). Not required for a single measure.

2 Approval in principle

Must be obtained **before** any work starts, from the Guichet unique des aides au logement.

3 Carrying out the work

By a company registered and certified in Luxembourg. Keep quotes, invoices and proof of payment.

4 Payment request

To be submitted within 4 years from 31 December of the invoice year.

Mistake #1: starting the work before approval in principle leads to **automatic rejection** of the application.

Documents to prepare (payment request)

- | | |
|--|---|
| ☐ DEPA-2026 form (individual or legal entity) | ☐ Approval in principle from step 2 |
| ☐ Recent bank details (RIB / IBAN) | ☐ Energy advice report (if applicable) |
| ☐ Itemised, paid invoices | ☐ Performance evidence (U-value, efficiency, kWp...) |
| ☐ Proof of payment (bank statements) | ☐ Applicant's ID document |

Mistakes that cost you the grant

- ✗ Starting the work before approval in principle (automatic rejection).
- ✗ Invoice not itemised by task, without stated performance figures.
- ✗ Payment request submitted outside the 4-year deadline.
- ✗ Work done by a company not registered in Luxembourg.

Estimate your grants in 30 seconds and get **up to 6 quotes** from verified companies on **tack.lu** — free and no obligation.
